## INNOVATIVE ORTHODONTIC CENTERS, PC

### DR. MANAL IBRAHIM

**Q:** How does it feel to be one of Chicago's leading orthodontists?

**A:** I am thrilled to be one of the leading doctors in Chicago, especially since the Gold Coast is where I first established my family-oriented presence years ago. Using invisalign and clear braces, I have built a cutting-edge orthodontic practice customizing treatment plans for patients of all ages.

**Q:** What separates you from others who practice orthodontics?

**A:** Being dual-trained in the specialties of

orthodontics and prosthetic dentistry (implants and reconstruction) makes me uniquely qualified to treat adults with any degree of complexity. When I first meet my patients, I listen to their concerns, share my vision for their outcome, and then take them on a journey to achieve a beautiful and functioning smile with a lifetime of benefits.

**Q:** Which service do you provide your patients that has the most significant impact on their lives?

**A:** Sometimes patients come to me feeling discouraged because they are unhappy with their smile

and were once told that nothing could be done about it. My extensive training and background allows me to be creative and overcome the challenges of treatment. It warms my heart to change their lives forever by giving them the smile they have always dreamt of.

Dr. Manal Ibrahim, a specialist in orthodontics, strives to make her state-of-the-art offices mimic the way her family feels when they walk into her house for a warm gathering. This allows her to provide outstanding orthodontic treatment in a personal and comfortable atmosphere.
