

Are Custom Smiles the New Birkins?

The latest status symbol might surprise you.

In the era of quiet luxury, the most powerful statement isn't loud logos; it's the confidence and subtle glow that comes from investing in yourself. One way tastemakers are achieving this effortless elegance is through bespoke smile design, and Naperville has become a destination for it.

Discerning patients from across the country travel to Innovative Orthodontic Centers and Naperville Dental Specialists for natural-looking results that radiate health and confidence, not dental work.

Think custom Invisalign® aligners combined with next-level red light therapy to quickly and comfortably straighten teeth in a way that enhances your facial features. Or porcelain veneers individually glazed by hand to capture the translucency, texture and detail of natural enamel.

“With the right provider and the right tools, Invisalign can help adults achieve beautiful, functional smiles, even those who were told they weren't candidates or needed jaw

surgery,” says Dr. Manal Ibrahim, American board-certified orthodontist and founder of Innovative Orthodontic Centers. “We take a comprehensive approach to smile design that prioritizes facial harmony, bite function, and aesthetics. Sometimes, we'll even combine Invisalign and porcelain veneers to create that natural “Hollywood” smile.”

“The best cosmetic dentistry is undetectable”

- Dr Irene Jovicic

At Naperville Dental Specialists, Dr. Irene Jovicic brings the same artistry to cosmetic dentistry. She partners with the best ceramicists in the country to hand-design veneers that are indistinguishable from natural teeth.

“The best cosmetic dentistry is undetectable,” says Dr. Jovicic. “It's about enhancing your smile so you look like an elevated version of yourself.”

And like the most coveted luxury pieces, these results don't come from mass production. They require skill, advanced technology and an eye for balance that only a few practices nationwide can offer. Fortunately, two of them happen to be right here in Naperville.
